

TECHNICAL CHARACTERISTICS of NaCl grade A.

Characteristic	Norm
1. Appearance	Cristallic bulk good, white colour with grey, yellow, pink, blue shadings,
2. Mass fraction of NaCl, %, not less than	98
3. Mass fraction of calcium ion, %, not more than	0,20
4. Mass fraction of magnesium ion, %, not more than	0,10
5. Mass fraction of sulphate ion, %, not more than	0,40
6. Mass fraction of potassium ion, %, not more than	0,40
7. Mass fraction of non water-soluble residue in water, %, not more than	1,00
8. Mass fraction of water, %, not more than	0,70

Anticaking additive : Potassium ferricyanide min.100 ppm - max 150 ppm
